Dawson Creek, BC V1G 4A4

Dear Greg:

RE: Fort St. John Pilot Project Forest Operations Schedule # 3 – Final Version

The managing participants of the Fort St. John Pilot Project are pleased to submit for your records the final version of Forest Operations Schedule #3 (FOS# 3) for the Fort St. John Defined Forest.

FOS# 3 was subject to extensive public review and comment. The FOS was made available for government agency, First Nations, stakeholders and the general public's review and comment for a period of 160 days beginning April 7, 2017. Comments received by the participants to September 30 2017 have been considered in preparation of the final FOS. Summaries of comments received from stakeholders, agencies and First Nations are noted in FOS# 3 Appendices D and E. Revisions made to the FOS as a result of the public review are noted in Appendix F.

This final version of FOS# 3 identifies timber harvesting and road management activities proposed within the Fort St. John Defined Forest Area by the Pilot Project Participants, for the period October 4th, 2017 through September 31st, 2023.

The FOS has been prepared in accord with the *Fort St. John Pilot Project Regulation* and is consistent with Sustainable Forest Management Plan (SFMP) # 2 and draft SFMP # 3.

If you have any questions pertaining to the final FOS# 3 please contact the undersigned at 250-787-3651.

On behalf of the Participants,

Darrell Regimbald RPF
Planning Coordinator North and East
Canadian Forest Products Ltd.
